Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1(Currently Amended). An apparatus for forming a hollow golf club head, the apparatus comprising:

a first mold having a cavity with a plurality of depressions formed therein, each of the depressions having a depth substantially equal to a desired wall thickness of a corresponding portion of the hollow golf club head;

a second mold having a cavity formed therein, the second mold cavity being larger in volume than the first mold cavity and having a shape complementary to a desired exterior of the hollow golf club head, the second mold having a plurality of protuberances projecting into the cavity by an amount equal to the thickness of a portion of a wall of the hollow golf club head;

a ceramic core having an exterior surface corresponding to an interior surface of the hollow golf club head and the ceramic core having a volume corresponding to the interior volume of the hollow golf club head, the ceramic core being removably and sequentially placed in the first and second mold cavities; and

means for injecting wax into the first and second mold cavities, wherein the means for injecting wax forms a plurality of protuberances on the exterior surface of the ceramic core when the ceramic core is placed in the first mold cavity, each protuberance corresponding to a respective depression in the first mold cavity, the plurality of

protuberances of the second mold preventing wax from being formed on a portion of the ceramic core.

2-4 (Canceled).

5 (Currently Amended). The apparatus according to claim 1-4, wherein the plurality of wax protuberances properly position the ceramic core in the second mold cavity.

6 (Original). The apparatus according to claim 5, wherein the means for injecting wax forms wax about a majority of the exterior surface of the ceramic core and the wax protuberances.

7 (Original). The apparatus according to claim 1, wherein the first mold cavity further includes a plurality of channels formed therein, the channels interconnecting the depressions.
